

Fentanyl Facts

Fentanyl is a powerful synthetic opioid that increases risk of overdose

Fentanyl is up to **50x stronger than heroin** and **100x stronger than morphine**

Fentanyl is commonly found in **heroin**, but has also been found in **cocaine, crack, methamphetamine, ketamine** and **pills from non-medical sources**.

? Can you tell which of these pills is **real** and which is a **counterfeit**?

**You can NOT
detect
Fentanyl by
sight, smell or
taste.**
